

AI for Home Educators

West Virginia Home Educators Conference

Presented by Jack Spirko

JacksLaws.com & TheSurvivalPodcast.com

Our 5 Year Home School Journey

It began with CoVid
and mandatory
shut downs

I explained freedom to
him and what would
happen if he finished
his work early

My nine year old
grandson fought my
wife so hard she
cried on day two

*"The next day he
told my wife the
most beautiful thing
a child can say,
'Grandmaw, I want
to be free'."*

We finished the year
up and then used
Acellus Academy for
the next 5 years

How I Discovered AI

My podcast audience started asking about it from day one, half loved, half hated it

At first I found it clunky and basically a cheaters tool that was also wrong a lot

My other first reaction was that my grandchildren can't know it exists, too easy to cheat

I specialize in lifestyle design and this was a disruption so I had to learn more about it

Then I began to unlock its power, and started building courses on how to use it

Within days that turned into, "we have to teach them to use this if they are going to compete in society"

The Resistance

The Awakening

A Fundamental Reality about Teaching

The Flawed Approach

You can't force a child to learn a thing they have chosen not to learn

Forcing compliance

Great educators teach

The Empowered Reality

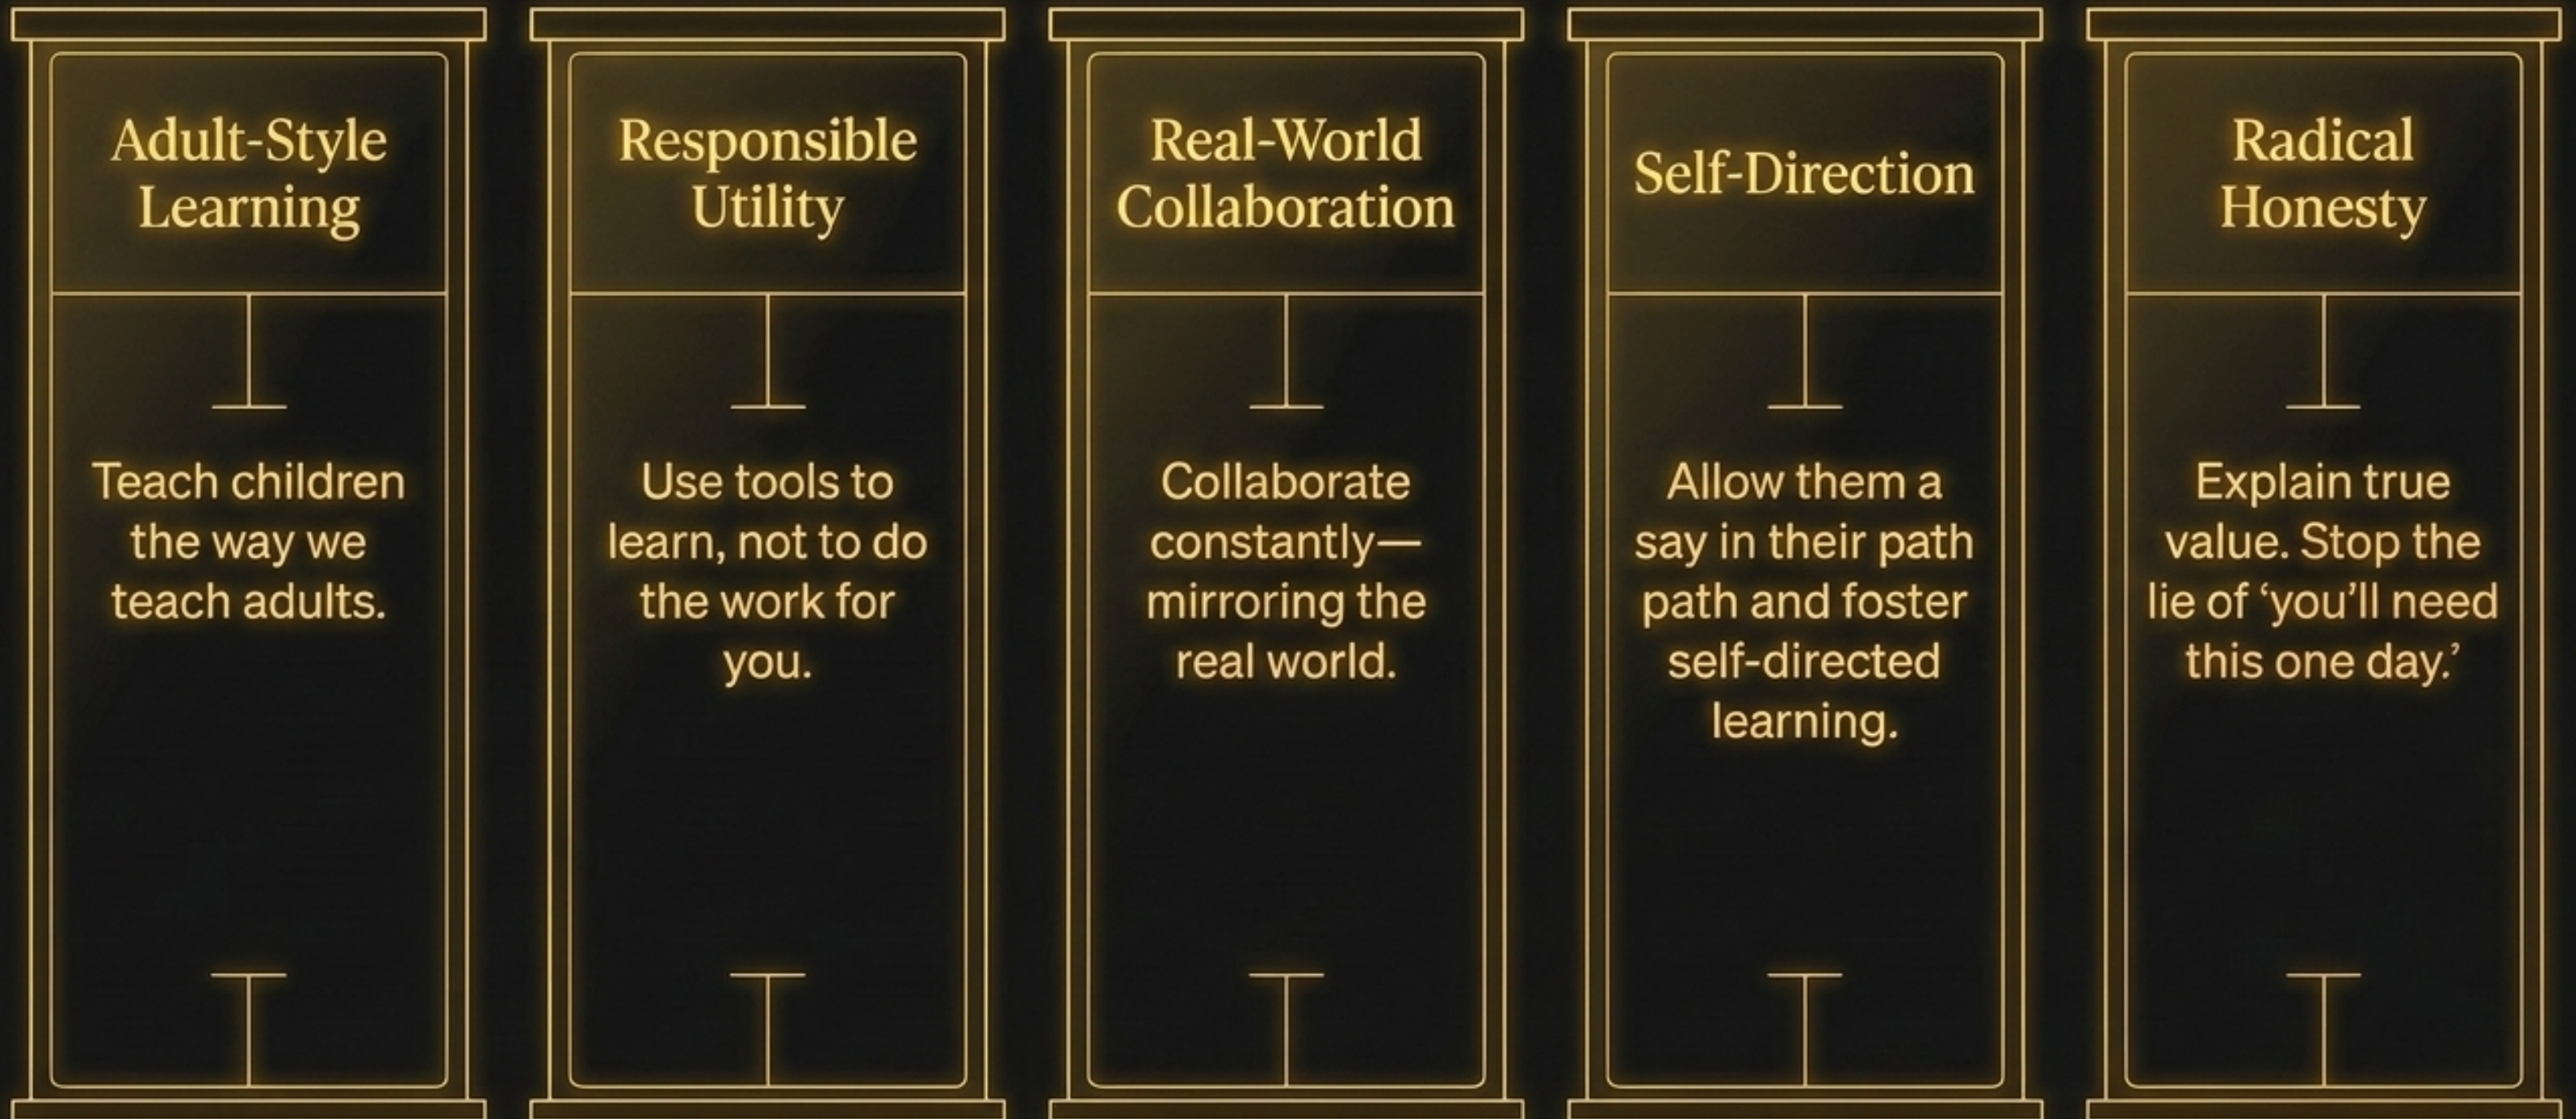

You can't stop a child from learning a thing they have decided they want learn

Sell our children on the ideas we want them to learn about, then step back and help them learn

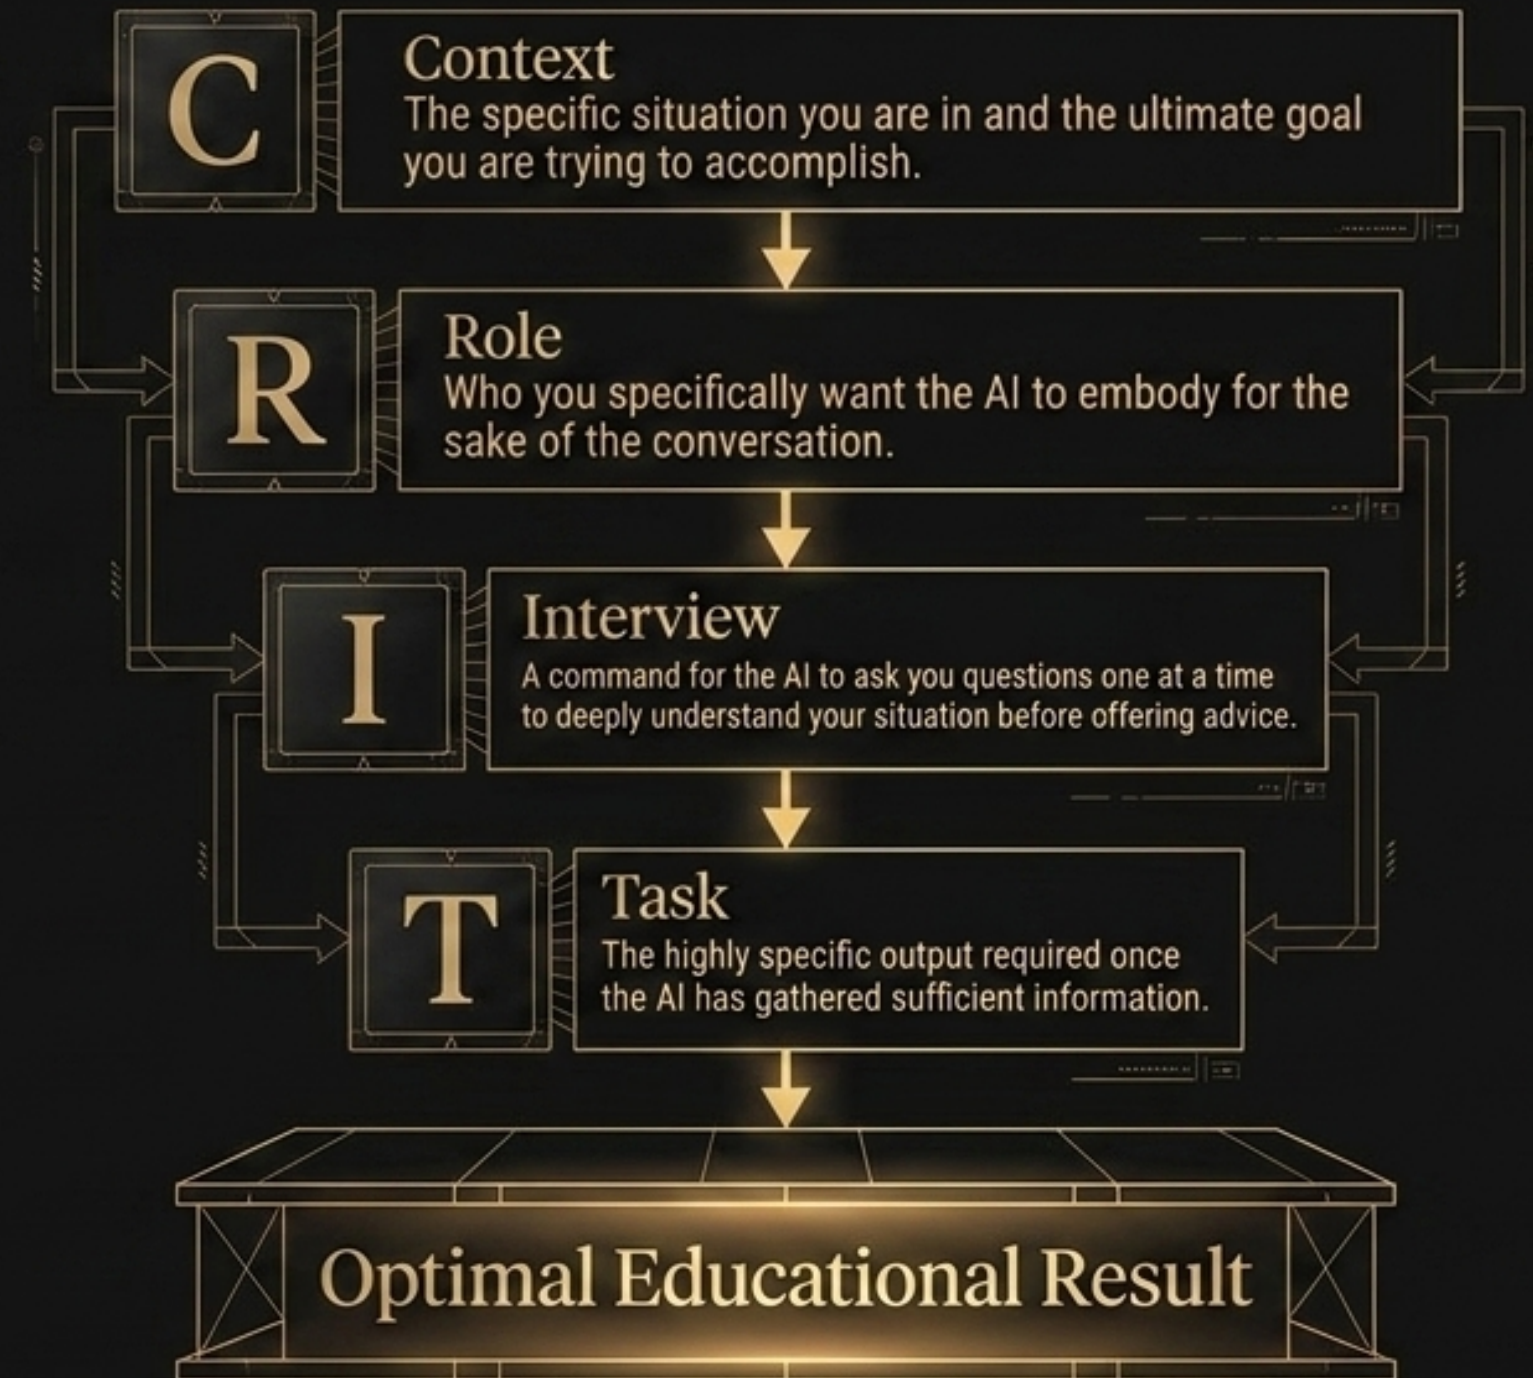

Great educators guide more than teach

How I convinced my granddaughter that reading is a super power

Methods of Using AI in Education

The C.R.I.T. Framework

Valuable Ways to Use AI in Education

Ask AI to be a Socrat and use the Socratic Method

Ask AI to assume the persona of historical figures and interview them

Create an AI to specifically spot logical flaws and present ideas and assignments to it

Teach them to create personal learning plans for their own 'electives'

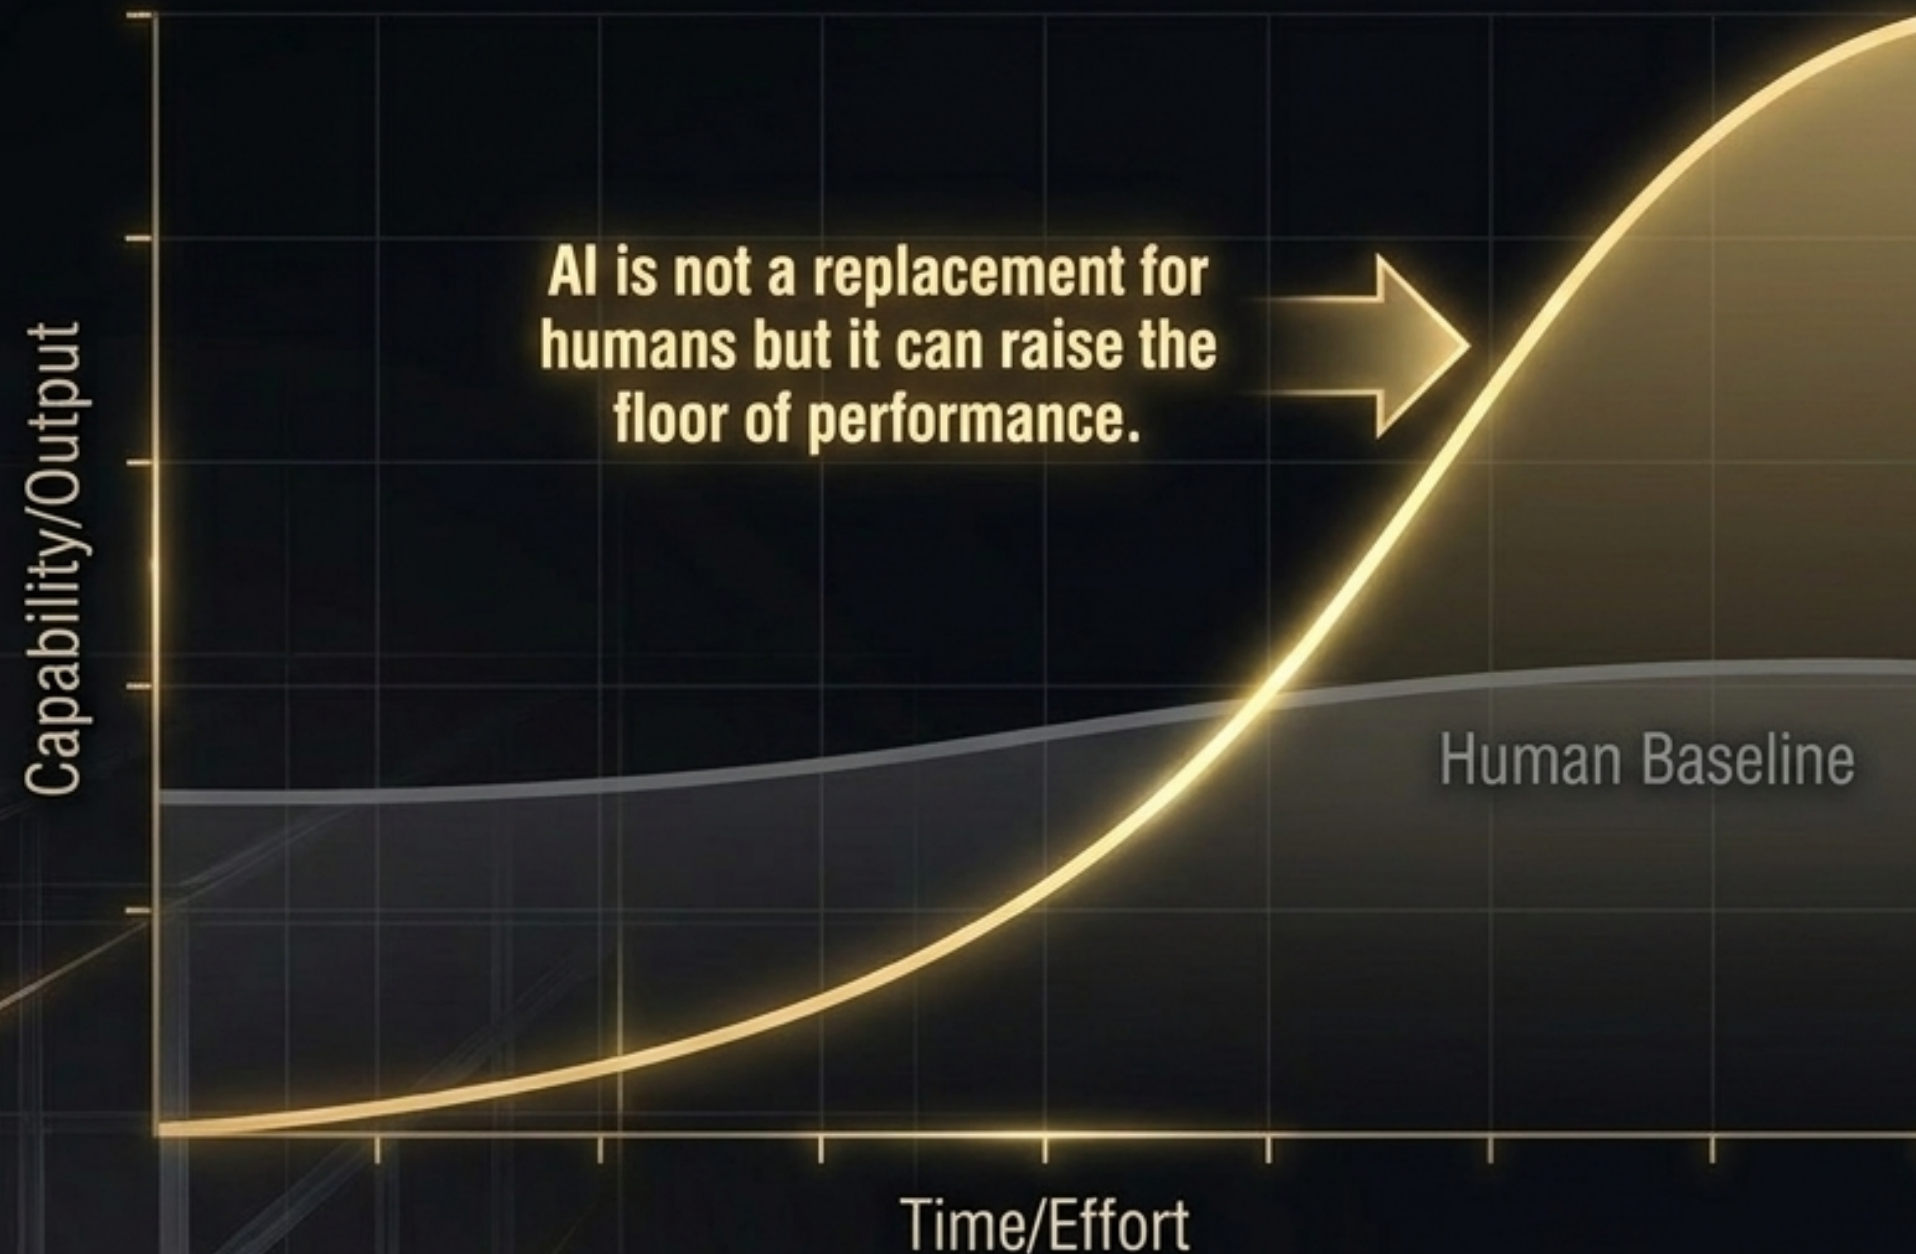

Use AI to teach foreign language courses (use voice mode)

Use AI to create engaging games like trivia games to help with memorization

The Reality is We Have to Teach AI Today

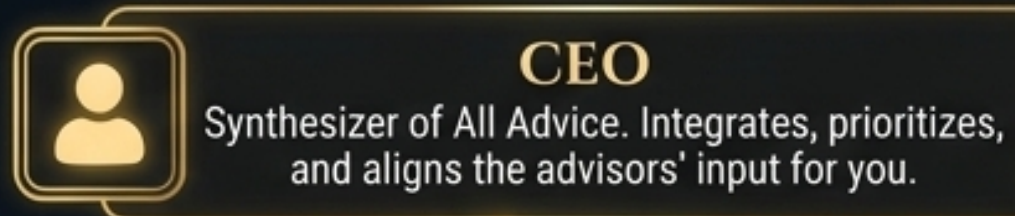

Activation Graph

- Love it or hate it AI isn't going away
- The version of AI you are using today will be the worst version you use
- Even many trade jobs that are 'AI proof' will still involve using AI
- The days of waiting for the green light are over
- AI can be a tool for personal agency or a tool to remove agency, the operator is the key

ME, MYSELF AND AI

Your Personal AI Leadership Team

DIRECTION

Big-picture guidance

EXECUTION

Plans into action

DEVELOPMENT

Growth and capability

RESOURCES

Income and stability

You chose home schooling to have real freedom and to teach your children what you want them to learn.

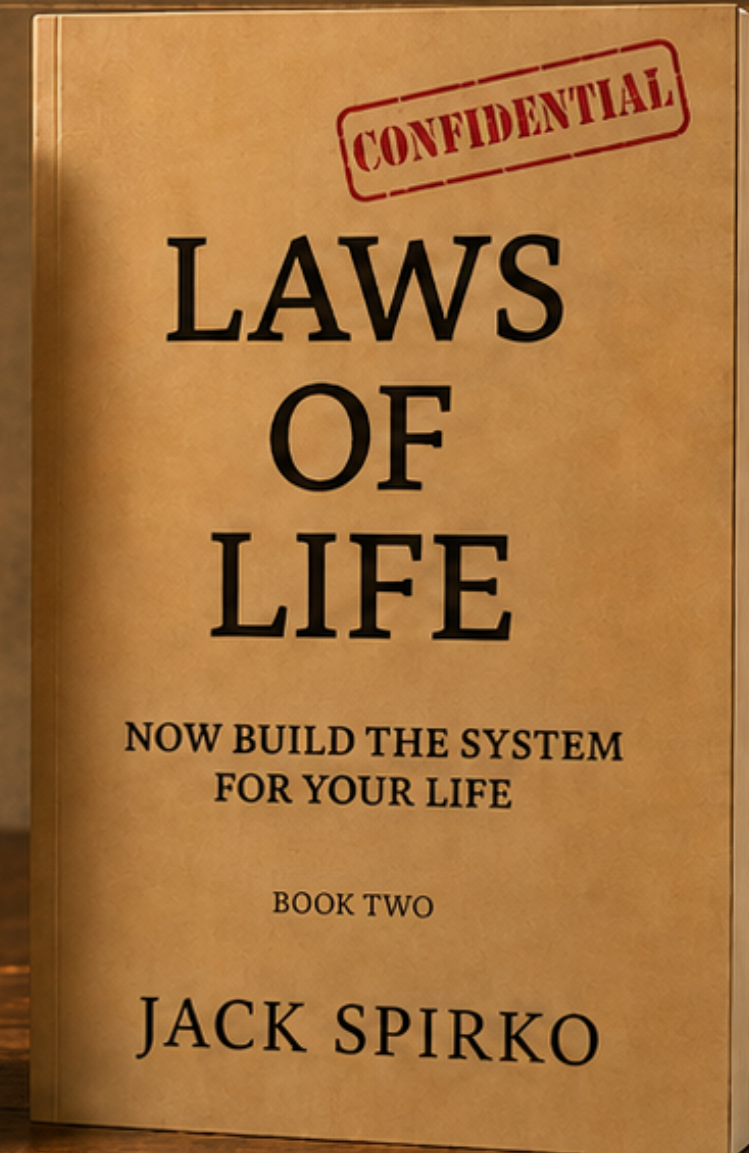

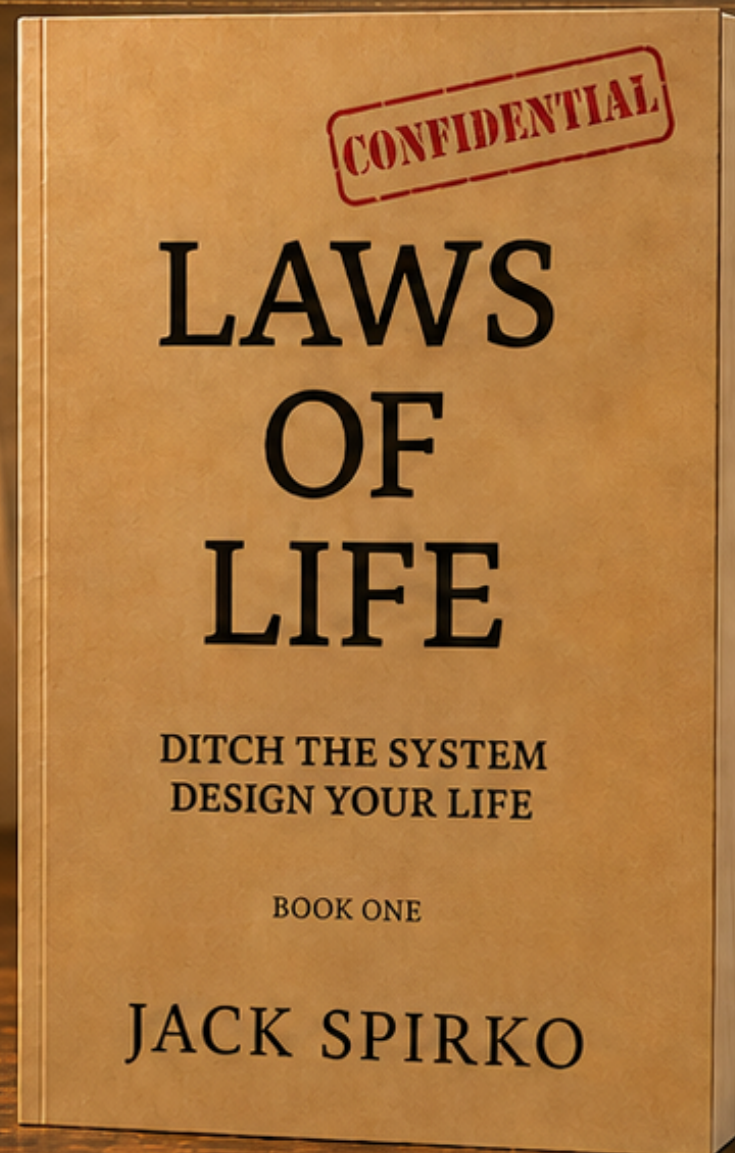

The bible tells us to Put on the full armor of God
Ephesians 6:11

Faith is an incredible thing to have and many choose home school for the freedom to teach it

Faith is the most important thing in the lives of many, but even they know it is not the only thing

Do not **only send your children into the world with the full armor of God. Send them with the full armor of knowledge as well.**
